Astrologers’ Workbench

Illustrated quick reference

ALPHABETICAL GUIDE / PURPOSE AND DISTINGUISHING FEATURES

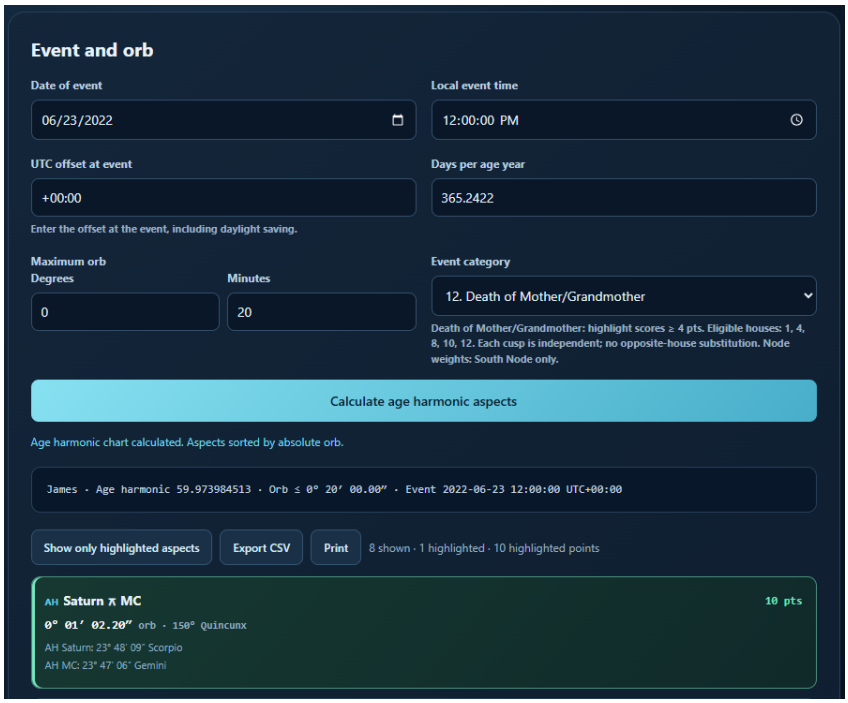

01

Age Harmonics

AgeHarmonics.html

A distinctive approach inspired by Dymock Brose, incorporating active house cusps to reveal striking symbolism and precise alignments at major life events.

AgeHarmonics.html

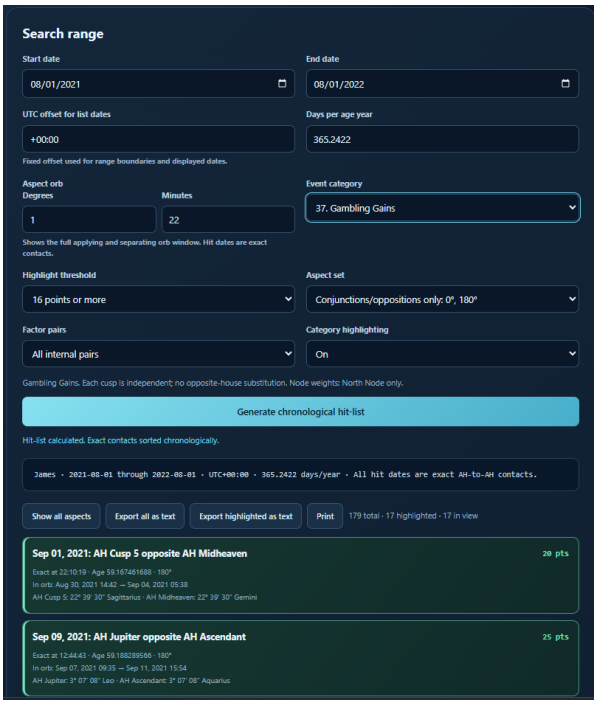

02

Age Harmonics Hitlist

AgeHarmonicsHitlist.html

Extends the Age Harmonics approach across a chosen period, listing forming aspects so significant alignments and their timing are easy to spot.

AgeHarmonicsHitlist.html

Astrologers’ Workbench

Illustrated quick reference

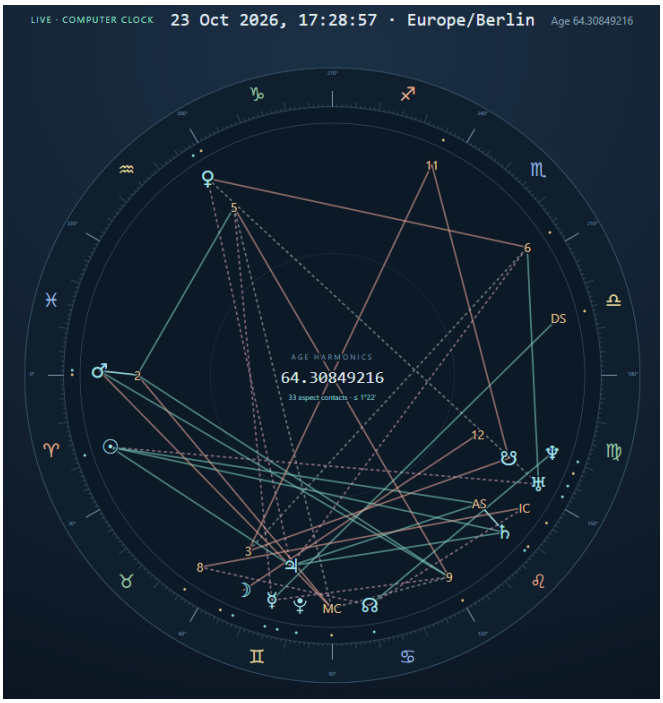

03

Age Harmonics Live

AgeHarmonicsLive.html

An interactive view that brings any radix chart forward to its current Age Harmonic chart, allowing you to explore the symbolism unfolding now.

AgeHarmonicsLive.html

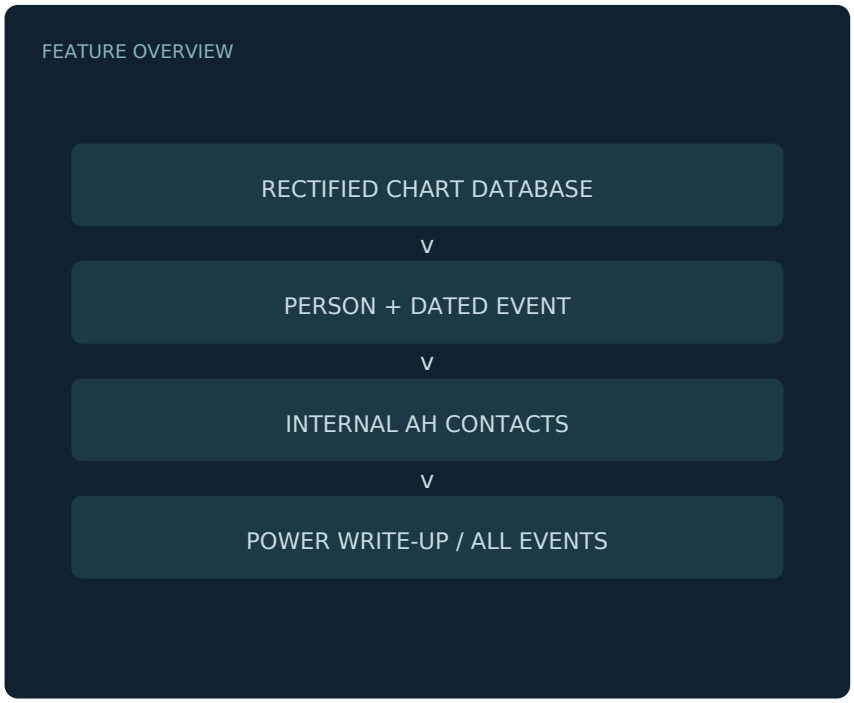

04

Age Harmonics Research

AgeHarmonics_Research.html

Brings the rectification database into Age Harmonics research. Load a person and dated events, inspect internal harmonic contacts, and create a Power write-up across the event list.

AgeHarmonics_Research.html

Astrologers’ Workbench

Illustrated quick reference

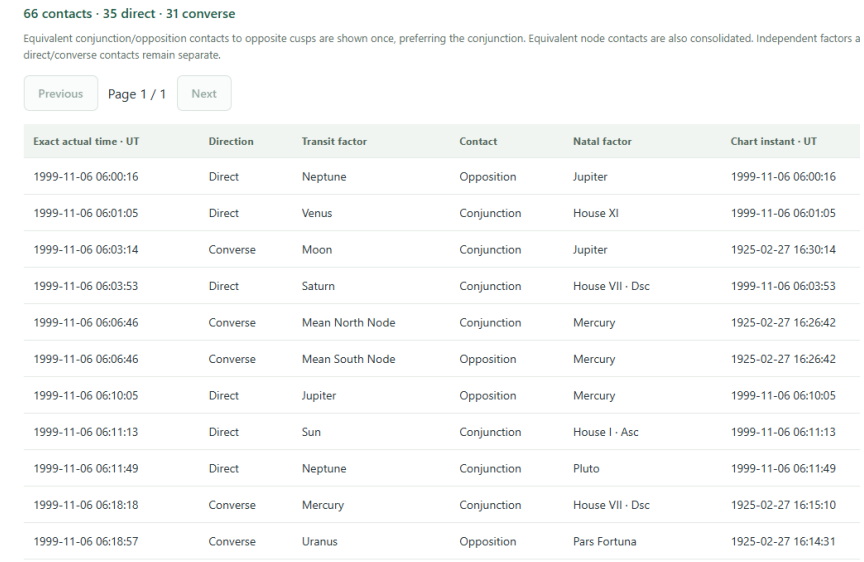

05

Ascensional Transit Hit List

`AscensionalTransitsHitlist.html`

Calculates and lists otherwise demanding MDO contacts, revealing the timing of aspects associated with events and circumstances both large and small.

AscensionalTransitsHitlist.html

66 contacts · 35 direct · 31 converse

Equivalent conjunction/opposition contacts to opposite cusps are shown once, preferring the conjunction. Equivalent node contacts are also consolidated. Independent factors a direct/converse contacts remain separate.

Previous | Page 1 / 1 | Next

Exact actual time · UT	Direction	Transit factor	Contact	Natal factor	Chart instant · UT
1999-11-06 06:00:16	Direct	Neptune	Opposition	Jupiter	1999-11-06 06:00:16

06

Ascensional Transits

`AscensionalTransits.html`

Calculates aspects in MDO for a specific date and time, making these demanding calculations readily available for close examination of an event.

AscensionalTransits.html

Apply the special precession and ΔT correction

Direct transits: add the correction to the event RAMC. Natal MDO positions stay fixed.

▸ Calculation settings and optional correction values

Calculate transits | Load Elizabeth II example | Export aspect table | Print / save PDF | Enter UT directly; no daylight-saving conversion is applied.

Event RAMC used: 45°23′27″

Special correction: Off · available: 0°34′01″

Aspects within selected orbs: 1

Direct transits · Birth 1962-07-03T11:16:44 UT · Event 2013-03-18T14:30:00 UT. Base event RAMC 45°23′27″. Estimated/selected precession 42.503′; ΔT birth 34.21 s, event 68.13 s.

Ascensional aspects

Event planet	Aspect	Natal factor	Orb	Event MDO / Q	Natal MDO / Q
Pluto	Opposition	Mars	12.553′	44°58′33″ / 3	44°46′00″ / 1

House cusps have the chapter’s fixed MDO values. Antiscia use adjacent quadrants. Contacts across meridian and horizon boundaries are handled continuously.

Astrologers’ Workbench

Illustrated quick reference

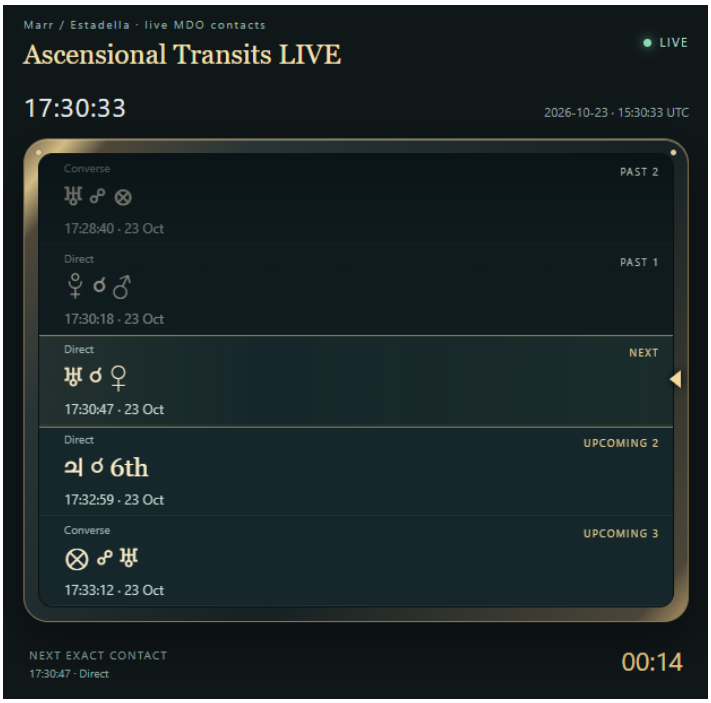

07

Ascensional Transits LIVE

`AscensionalTransits_LIVE.html`

Uses the natal chart, a chosen location and the computer clock to display current MDO aspects as they form, bringing their precise timing into view.

AscensionalTransits_LIVE.html

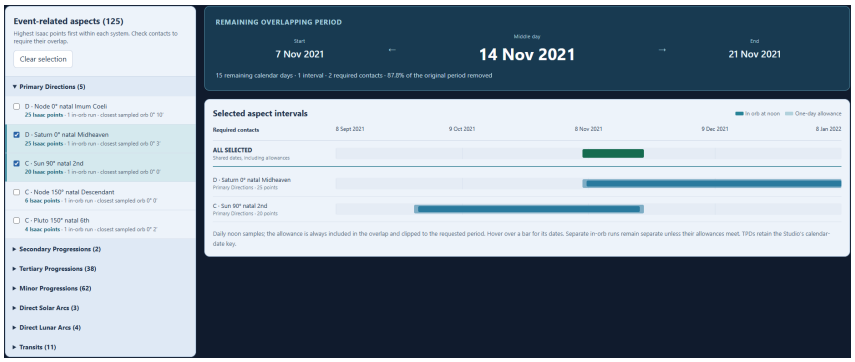

08

Aspect Overlap Finder

`OverlapFinder.html`

Narrows a chosen period by finding overlaps among forming aspects relevant to an event category, helping pinpoint the strongest timing windows for that theme.

OverlapFinder.html

Astrologers’ Workbench

Illustrated quick reference

09

Astrological Event Convergence Scanner

`AstroConvergenceScanner.html`

Examines a radix chart across seven systems, several including converse calculations, to bring the strongest recurring planetary themes at a given time into focus.

AstroConvergenceScanner.html

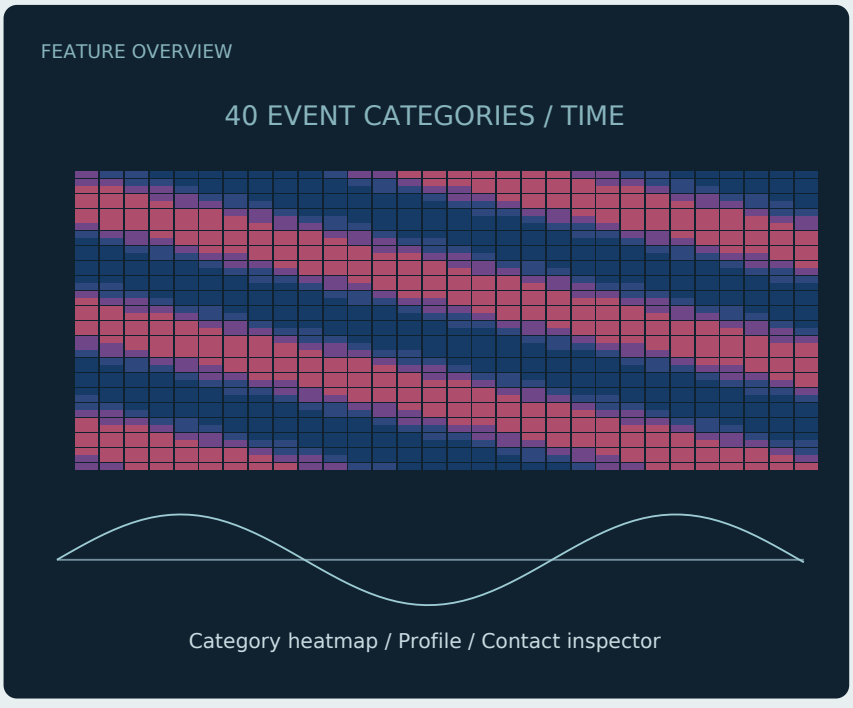

10

Category Activation Timeline

`CategoryActivationTimeline.html`

Maps event-category activation over time as a heatmap and focused graph. Compare Isaac scores or systems agreeing, then inspect the contacts behind a sample. Examine date scans a 60-day window around a chosen date.

CategoryActivationTimeline.html

Astrologers’ Workbench

Illustrated quick reference

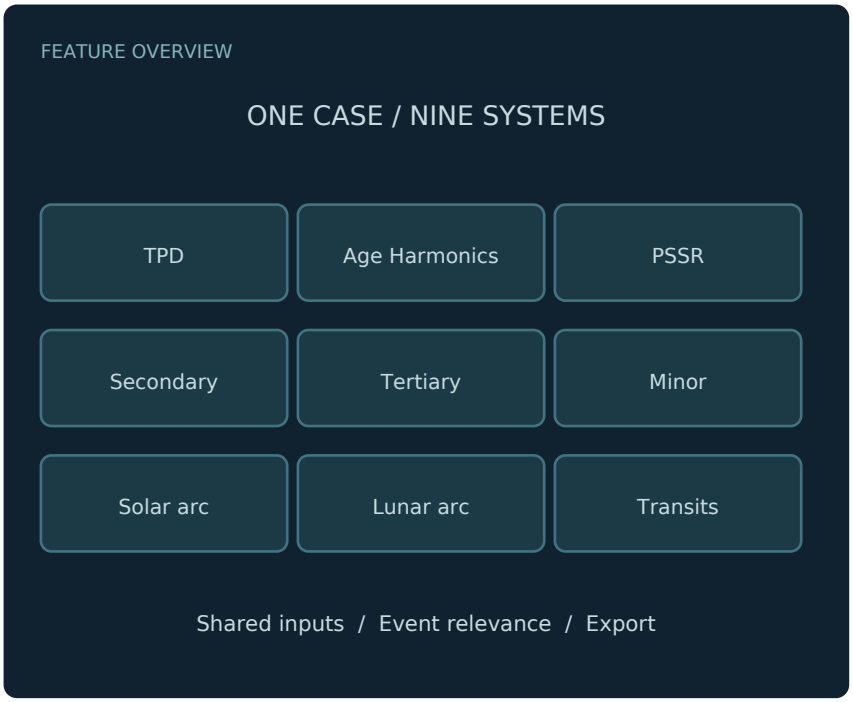

11

Central Scrutinizer

`CentralScrutinizer.html`

Connects one case and its events to nine systems. A searchable database, shared birthtime controls, clear dark aspect panels, personal database saves and Master export support a whole biography.

CentralScrutinizer.html

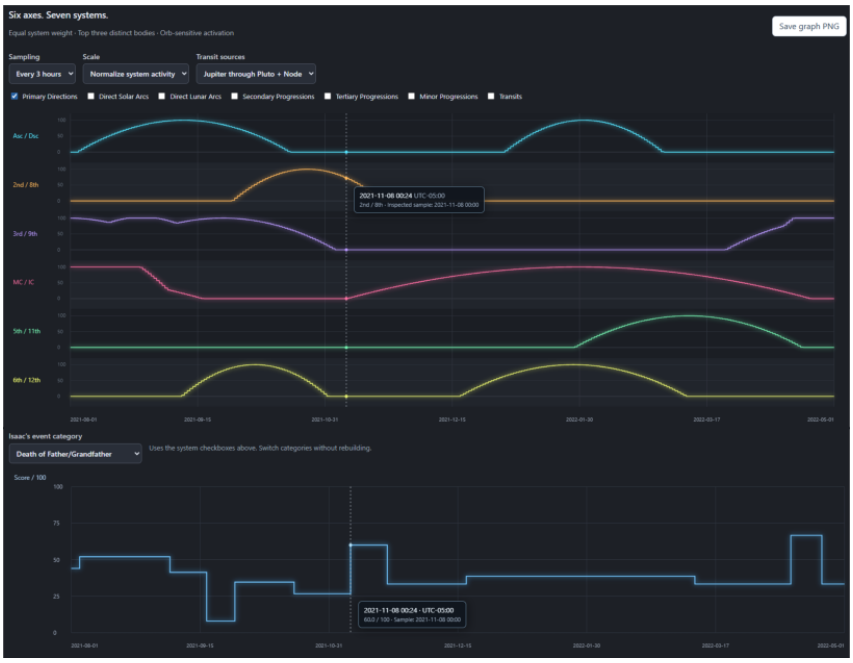

12

Cusp Category Graph

`CuspCategoryGraph.html`

Maps cusp-axis activations through time using your chosen systems, alongside an event-category graph that makes changing areas of emphasis easy to see.

CuspCategoryGraph.html

Astrologers’ Workbench

Illustrated quick reference

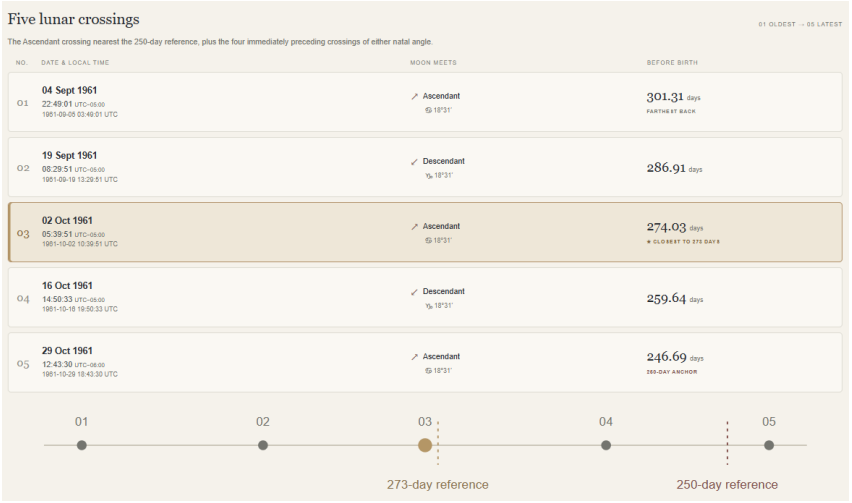

13

Epoch Chart Finder

EpochFinder.html

Uses an accurate birth chart to identify five candidate epoch times satisfying Epoch Moon = natal Ascendant or Descendant. It highlights the candidate nearest 273 days before birth as the preferred starting point for assessment.

EpochFinder.html

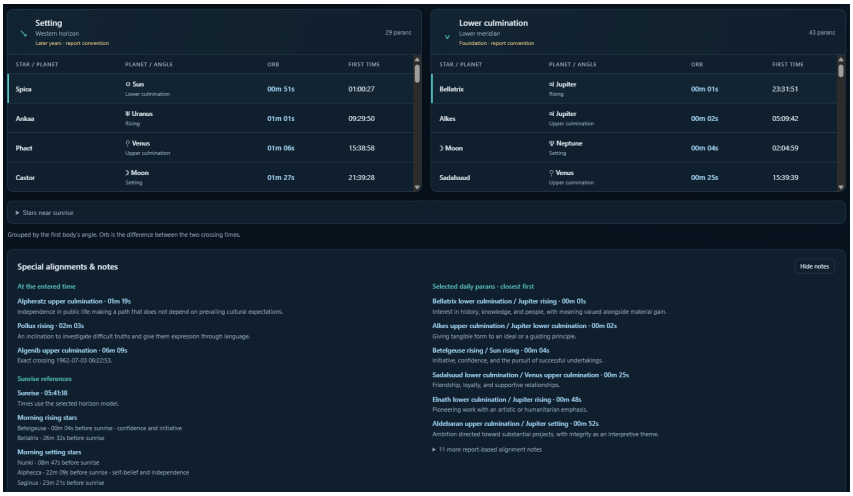

14

Fixed Star Parans

FixedStarParans.html

Presents fixed-star alignments and paran information, offering a rich source of chart insights and promising avenues for further exploration.

FixedStarParans.html

Astrologers’ Workbench

Illustrated quick reference

15

House Activation Timeline

HouseActivationTimeline.html

Shows house activity over time as a twelve-house heatmap and a focused activation graph. Compare systems agreeing or contact intensity, then inspect the contacts behind a sample or peak.

HouseActivationTimeline.html

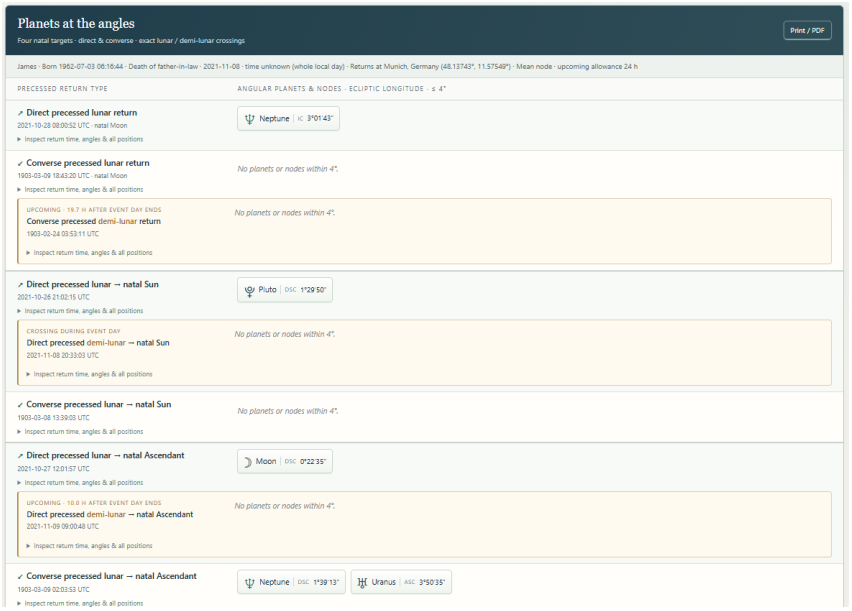

16

Lunar Angles

LunarAngles.html

Identifies angular planets in Lunar, Lunar → Sun, Lunar → Ascendant and Lunar → Midheaven charts, with direct and converse options for each.

LunarAngles.html

Astrologers’ Workbench

Illustrated quick reference

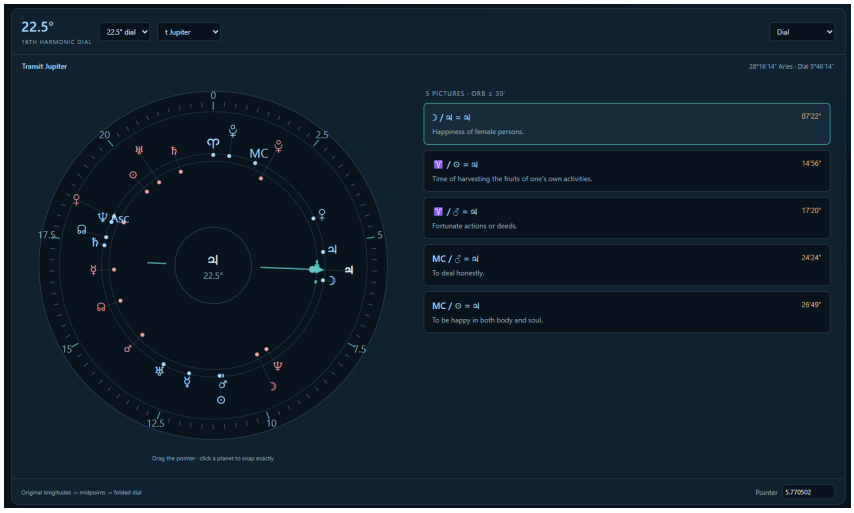

17

Midpoint Lab

MidpointLab.html

Explores a chart’s midpoint relationships, with optional Trans-Neptunian Planets and a transit overlay to connect natal patterns with current activations.

MidpointLab.html

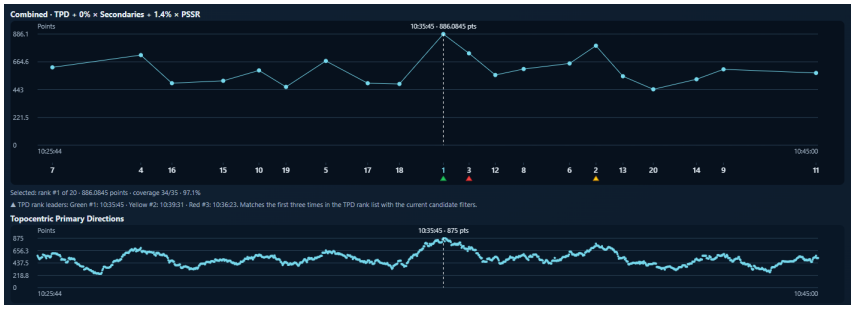

18

Polaris2

Polaris2.html

Developed from Isaac Starkman’s renowned rectification program in collaboration with Isaac, Juan Estadella and Fadi Mazboudi, Polaris2 extends the original approach with graphical comparisons and detailed event-aspect lists that help resolve complex rectifications.

Polaris2.html

Astrologers’ Workbench

Illustrated quick reference

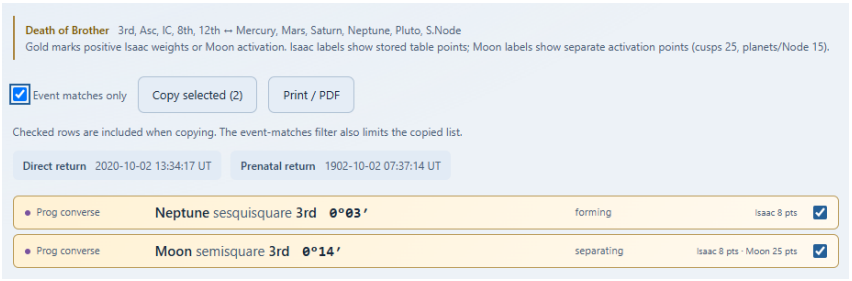

19

PSSR Aspects

PSSR_Aspects.html

Displays progressions and regressions from precessed solar and prenatal solar returns. Its timing sensitivity makes it a valuable rectification check, as small birthtime adjustments produce large shifts in aspect timing.

PSSR_Aspects.html

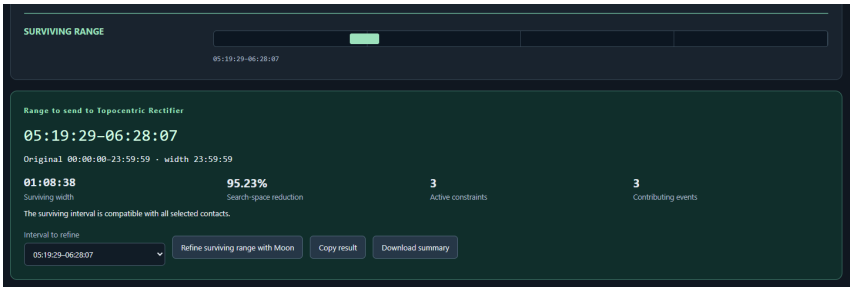

20

PSSR Sieve

PSSR_Sieve.html

Uses a graphical display of relevant PSSR aspects to narrow the candidate birthtime range, giving Polaris2 a more focused search and helping distinguish the strongest times.

PSSR_Sieve.html

Astrologers’ Workbench

Illustrated quick reference

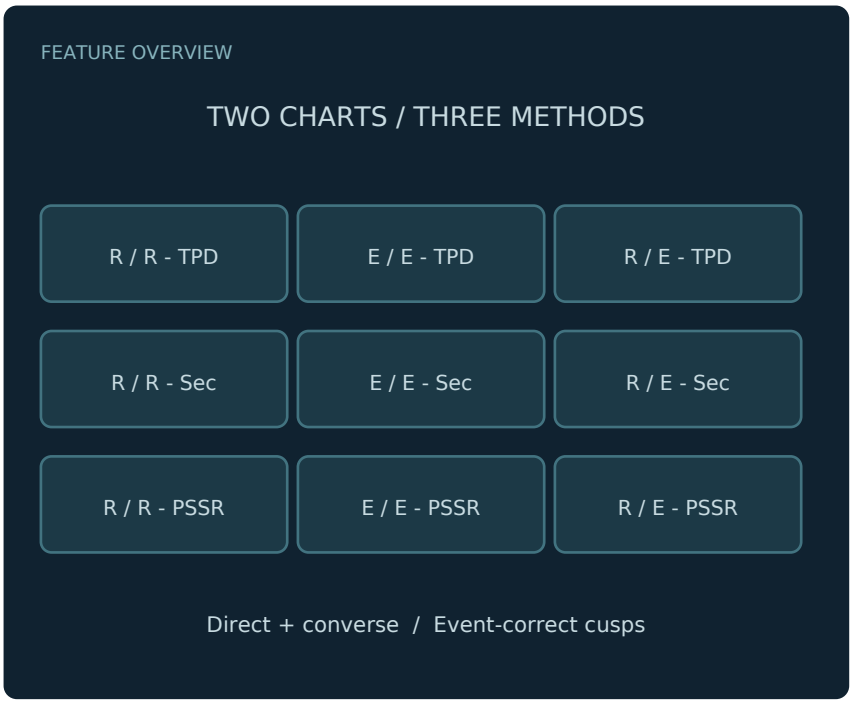

21

Radix and Epoch Aspect Studio

`DualTest.html`

Examines radix and epoch charts across TPD, secondary progressions and PSSR, including both interaction routes. Updated tiles clarify highlighted contacts; event categories select the relevant house references.

DualTest.html

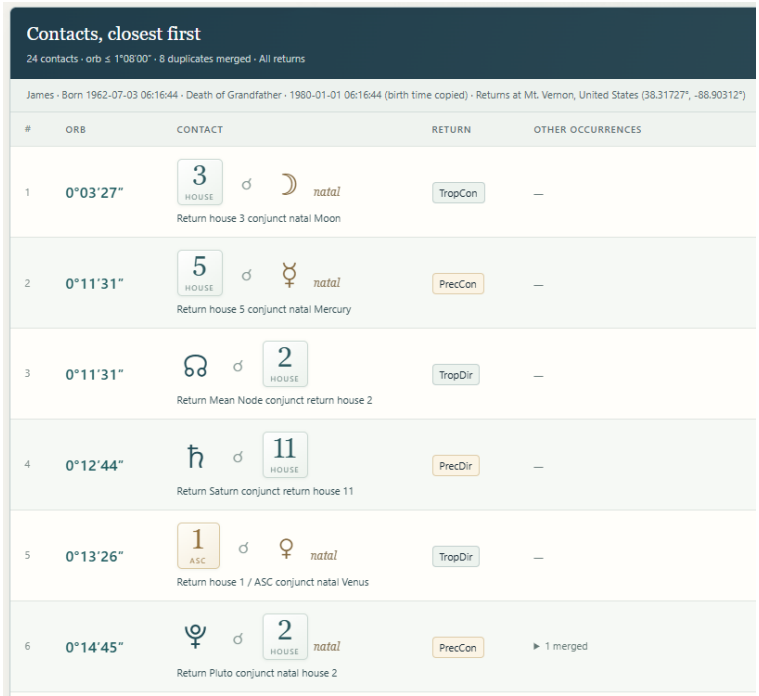

22

Solar Contacts

`SRA.html`

Calculates tropical solar returns and their converse counterparts, plus direct and converse precessed solar returns, using the demi-solar when closer. Aspect lists highlight notable contacts within each return’s period.

SRA.html

Astrologers’ Workbench

Illustrated quick reference

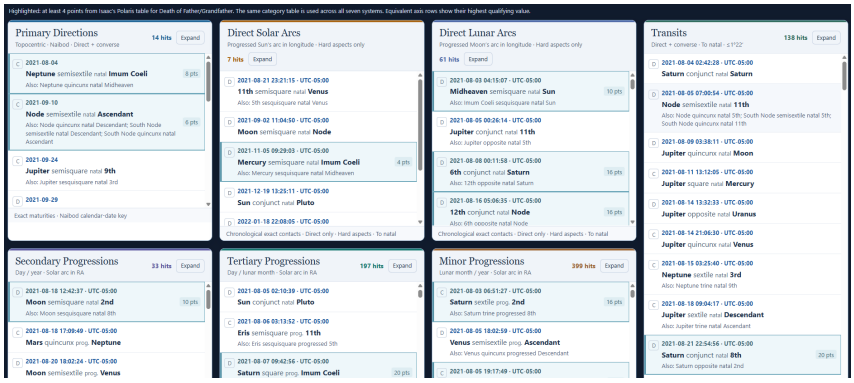

23

Studio Hitlists

StudioHitlist.html

Lists forming aspects across seven systems, many with direct and converse calculations, with event-category filtering to focus attention on contacts relevant to the subject being investigated.

StudioHitlist.html

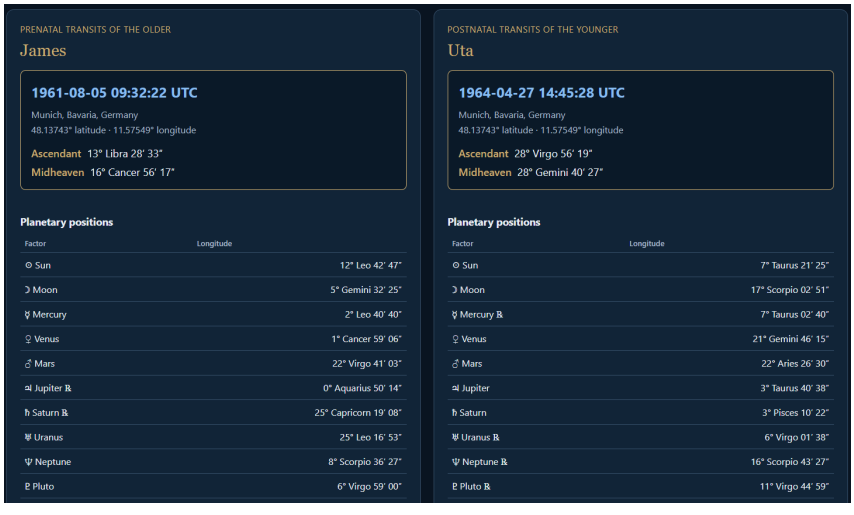

24

The New Partner Horoscope

NewPartnerHoroscope.html

Applies Alexander Marr’s relationship technique to derive two charts from the younger person’s prenatal transits to the older’s chart and the older person’s postnatal transits to the younger’s chart. Both are cast for the meeting place and apply to relationships of any kind.

NewPartnerHoroscope.html

Astrologers’ Workbench

Illustrated quick reference

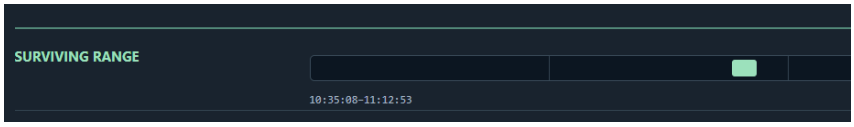

25

The Sieve

`TheSieve.html`

Uses secondary-progression alignments to narrow the birthtime search range. Together with PSSR Sieve, it helps focus Polaris2’s search when a broad range makes the rectification less clear.

TheSieve.html

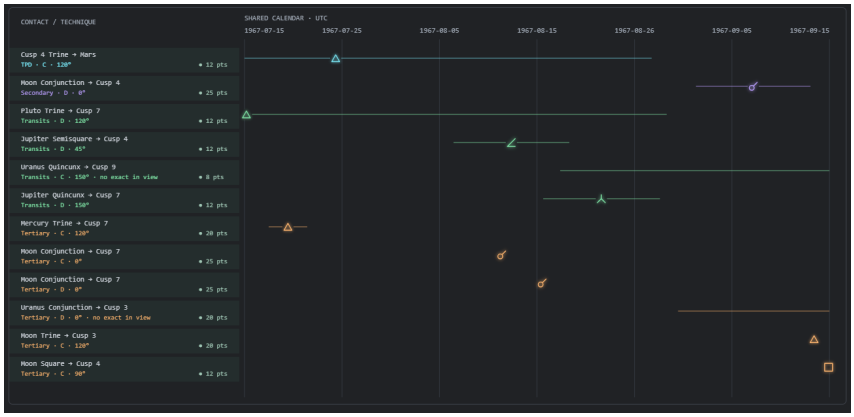

26

Timeline

`Timeline.html`

Creates a graphical aspect timeline that fits your chosen display size, trimming less important contacts to keep the view clear and readable. Event-category filtering brings the most relevant activity into focus.

Timeline.html

Astrologers’ Workbench

Illustrated quick reference

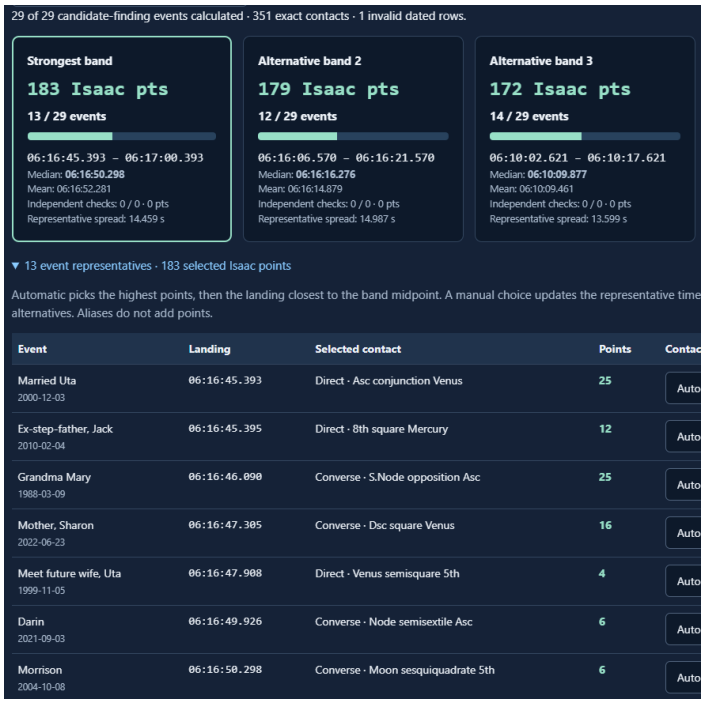

27

Topocentric Birthtime Convergence Matrix

TBCM.html

Helps refine an already close birthtime, particularly within about ±5 minutes, by identifying anchor primary directions whose convergence tightly constrains the time.

TBCM.html

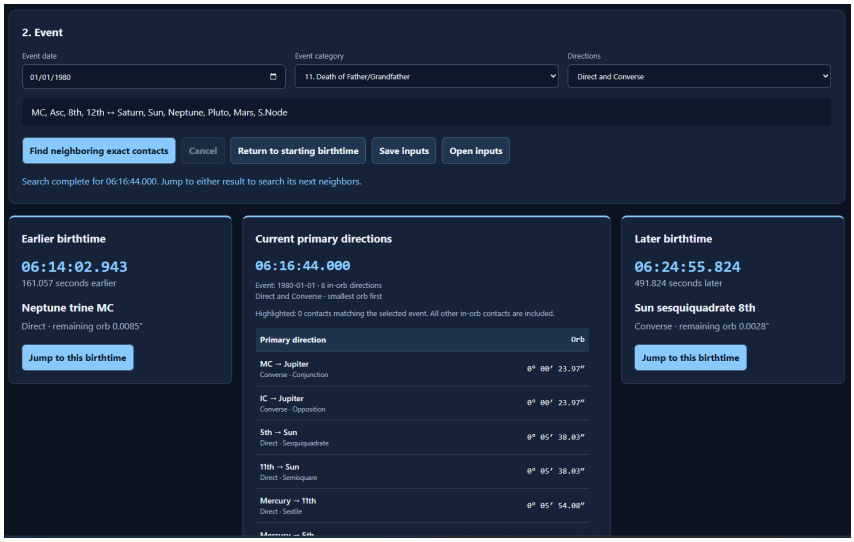

28

Topocentric Exact Contact Navigator

TPD_ContactNavigator.html

Moves backward or forward from the birthtime under examination to the nearest candidate time where a theme-relevant topocentric primary direction becomes exact, making partile contacts easy to locate and compare.

TPD_ContactNavigator.html

Astrologers’ Workbench

Illustrated quick reference

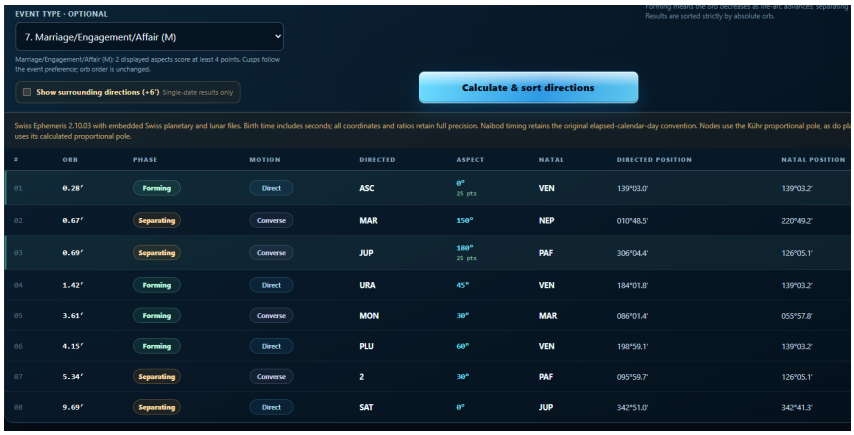

29

Topocentric Primary Directions

`TopocentricPrimaryDirections.html`

Displays active topocentric primary directions for a chosen date and time, sorted by orb, with event-category filtering to bring the closest relevant contacts into focus.

TopocentricPrimaryDirections.html

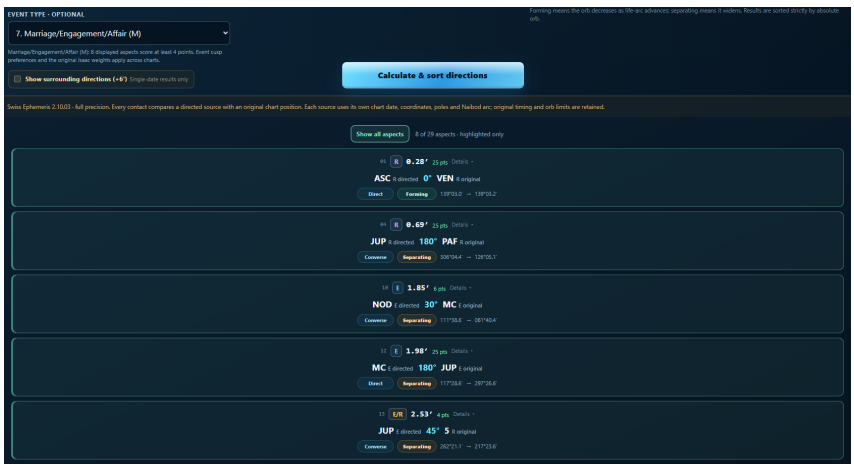

30

Topocentric Primary Directions: Radix and Epoch

`TopocentricPrimaryDirections2.html`

Extends the standard TPD module to both radix and epoch charts, bringing their active directions together for convenient examination.

TopocentricPrimaryDirections2.html

Astrologers’ Workbench

Illustrated quick reference

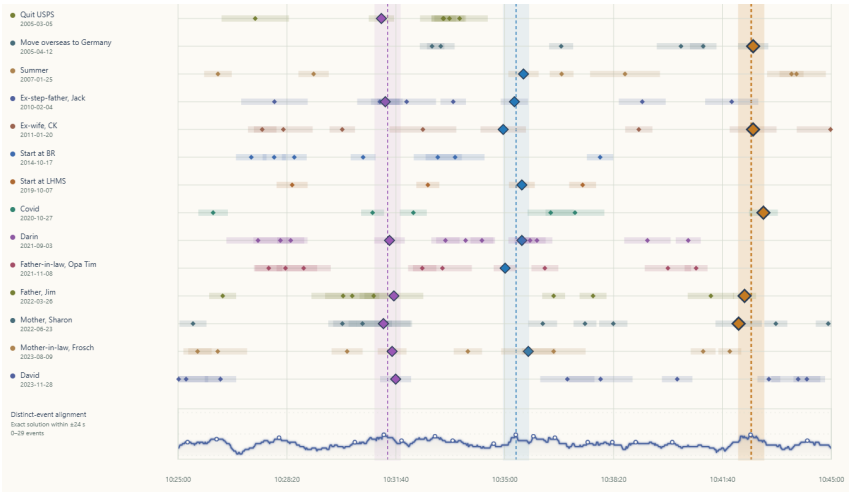

31

TPD Anchor Mapper

`TPD_AnchorMapper.html`

Maps partile topocentric primary directions graphically across an entire event list, revealing clusters of aligned candidate birthtimes that can be selected for closer analysis.

TPD_AnchorMapper.html

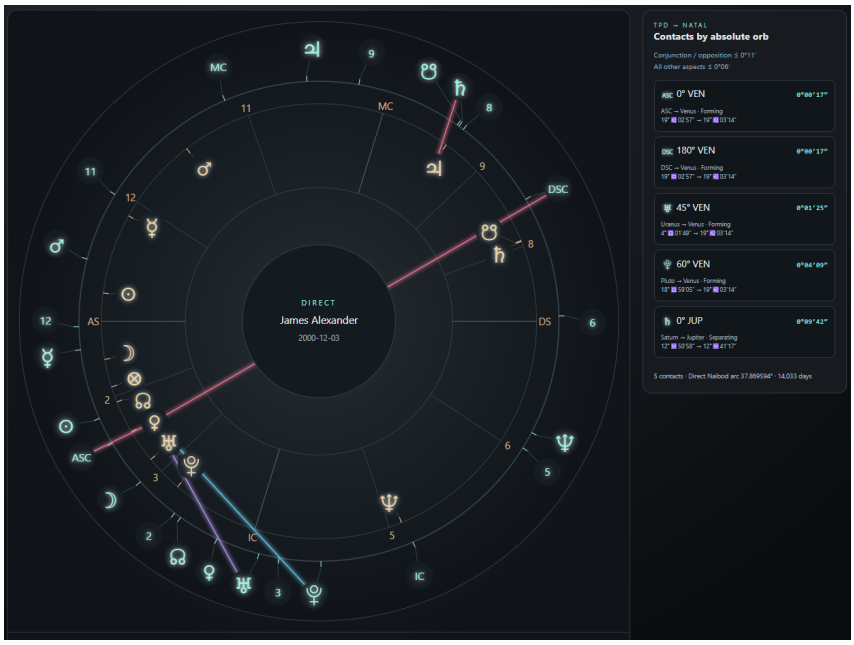

32

TPD Bi-Wheel

`TPD_BiWheel.html`

An interactive bi-wheel displaying direct or converse topocentric primary directions, making their relationships to the natal chart easy to explore visually.

TPD_BiWheel.html

Astrologers’ Workbench

Illustrated quick reference

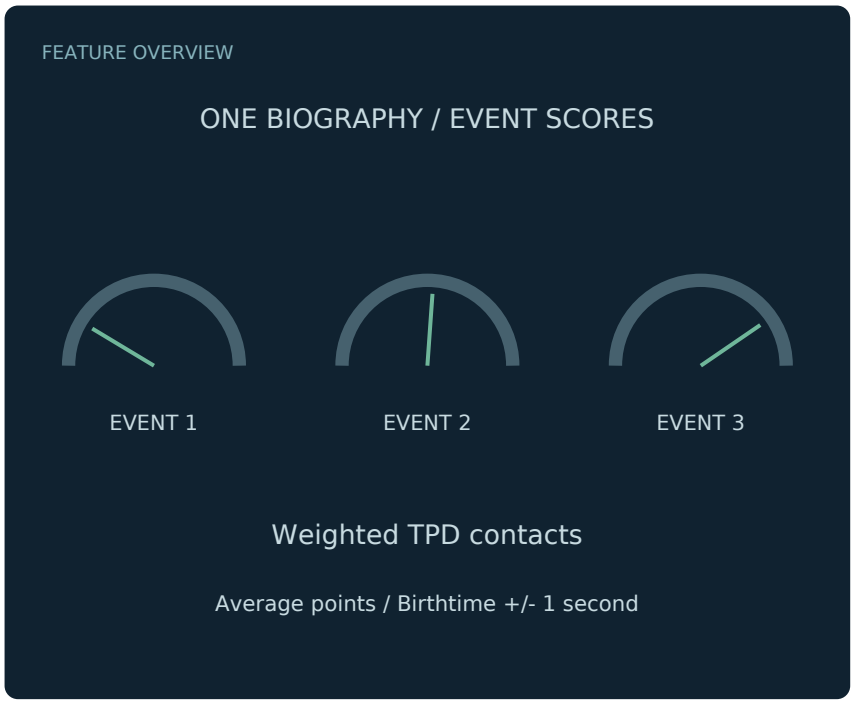

33

TPD Event Meters

TPD_Event_Meters.html

Displays weighted primary-direction scores for an entire event list as compact meters. Compare the average points per event, adjust birthtime by one second and inspect each meter’s contacts.

TPD_Event_Meters.html

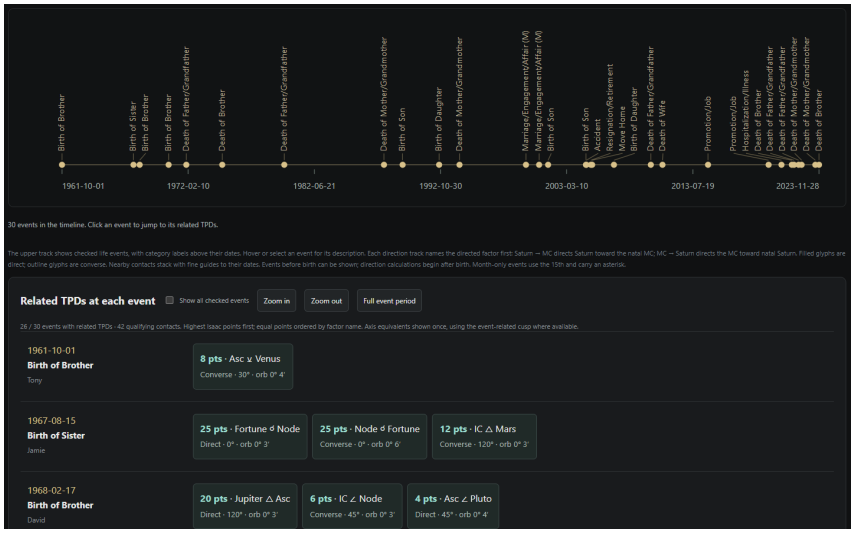

34

TPD Event Timeline

TPD_Event_Timeline.html

Places an entire event list on a timeline you define, with interactive navigation between each event and its corresponding aspects for quick comparison.

TPD_Event_Timeline.html

Astrologers’ Workbench

Illustrated quick reference

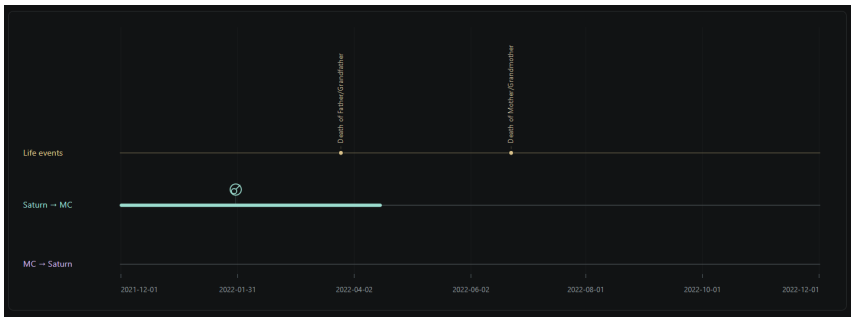

35

TPD Pair Timeline

TPD_Pair_Timeline.html

Tracks a chosen planet or point pair through its successive aspects across a lifetime, displaying repeated contacts alongside life events for direct comparison.

TPD_Pair_Timeline.html

36

TPD Three Birth Times

TPD_3xCompare.html

Compares topocentric primary directions for three candidate birthtimes at a chosen date and time, ranking the candidates by event category to help distinguish the strongest fit.

TPD_3xCompare.html
